

Galixis Axis Coupler Kit for Coupling

Product Part Number

N412.ACKA

Product Description

The Galixis Axis Coupler Kit is designed to securely couple cable trays, providing a reliable and stable connection. This kit includes two axis couplers, M6x20 carriage bolts, and M6 flange nuts. Made from carbon steel with EZ plating, the couplers offer excellent strength, corrosion resistance, and long-lasting performance for your cable management systems.

Product Features

- **Complete Coupling Solution** : Includes two axis couplers, M6x20 carriage bolts, and M6 flange nuts, offering a full set of components for tray coupling.
- **Durable Construction** : Crafted from carbon steel and surface-treated with EZ plating for enhanced strength and corrosion resistance.
- **Reliable Connection** : Ensures a strong, stable coupling between trays, enhancing the overall stability of the cable management system.
- **Easy to Install** : Simplifies tray coupling with easy-to-assemble components, reducing installation time and effort.
- **Long-Lasting Performance** : Designed for durability, offering reliable performance in both industrial and commercial environments.
