

Galixis Cable Exit Waterfall with 40mm Bend Radius

Product Part Number

N412.CEWxA

Product Description

The Galixis Cable Exit Waterfall is an innovative solution for smooth and organized cable routing. Featuring a 40mm bend radius, it ensures optimal cable protection while allowing flexible placement at any position on the tray. Made from durable carbon steel with EZ plating, it is easy to install with a simple click mechanism, providing a secure and efficient cable exit solution.

Product Features

- **Smooth Cable Routing** : Designed with a 40mm bend radius to prevent cable kinks and maintain optimal signal integrity during exits.
- **Flexible Positioning** : Can be fixed at any position on the cable tray, providing adaptable cable routing options for various setups.
- **Quick Installation** : Easy to attach with a simple click mechanism, reducing installation time and eliminating the need for additional tools.
- **Robust Construction** : Made from carbon steel with EZ plating, offering exceptional strength, durability, and resistance to corrosion.
- **Size Variations** : Available in two width options (W45mm and W90mm), catering to different cable volumes and requirements.
