

# StarTrail Fiber Raceway, 45° Vertical Down Elbow Cover for 600mm Duct (Metal)

## Product Part Number

N411.45VDEC6M

## Product Description

The StarTrail Fiber Raceway 45° Vertical Down Elbow Cover provides robust protection for cables transitioning downward in a fiber pathway. Crafted from 2.0mm thick carbon steel with a durable yellow powder-coated finish (Pantone 115U), it ensures reliable performance and a polished appearance. This metal cover is ideal for securing cables in high-density environments while maintaining structural integrity and safety.

## Product Features

- **Reliable Cable Protection** : Safeguards cables at 45° downward transitions, ensuring an organized pathway.
- **High-Quality Carbon Steel** : Crafted from 2.0mm thick carbon steel for excellent strength and durability.
- **Powder-Coated Finish** : Yellow coating (Pantone 115U) offers corrosion resistance and a professional appearance.
- **Seamless Compatibility** : Fits perfectly with StarTrail 600mm duct systems and 45° down elbow fittings.
- **Long-Lasting Performance** : Designed to withstand demanding environments in data centers and telecom facilities.
